

Windows 7

Before you start.

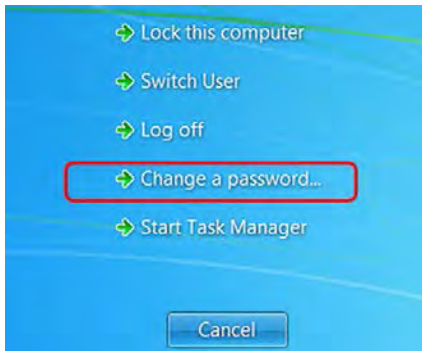

If you were provided with a temporary password for your new account please ensure you have logged into a TAFE computer and set a new password before attempting to connect to the TAFE_OPEN WiFi network.

If you have a working password please go to the next section *Steps to Connect to TAFE_OPEN*.

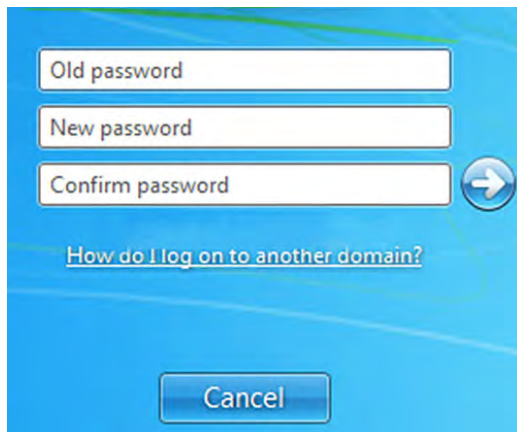

1. To Log in using your temporary password press CTRL + ALT + DELETE

2. An option Screen will appear. Click *Change a password*.

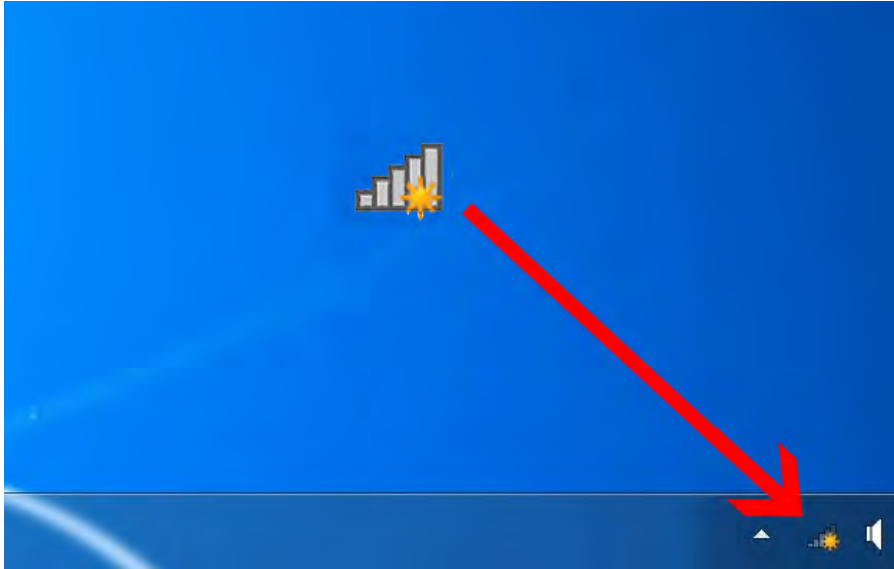

3. Fill out the three blank fields. Enter your temporary password.
Provide a new password and confirm it.
Click the arrow button to proceed with password change.

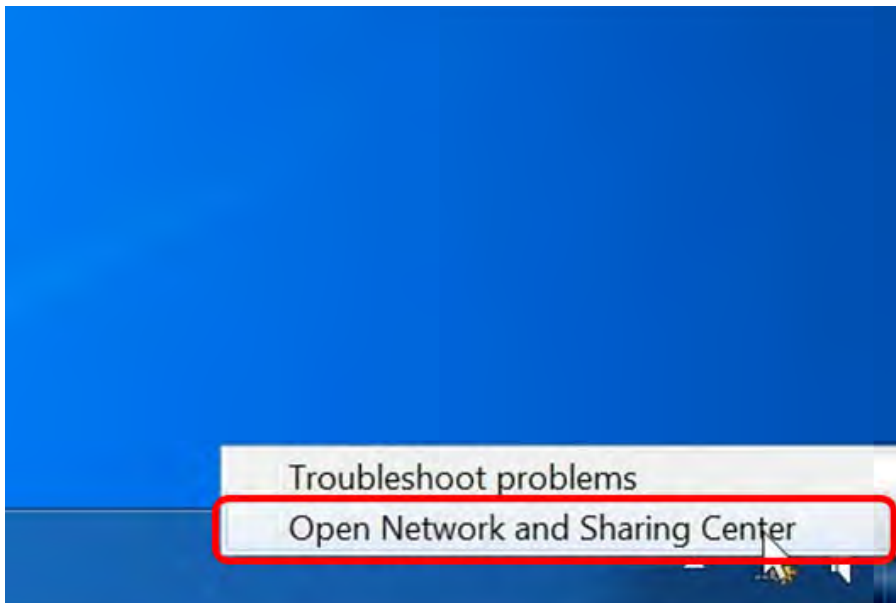

Steps to Connect to TAFE_OPEN

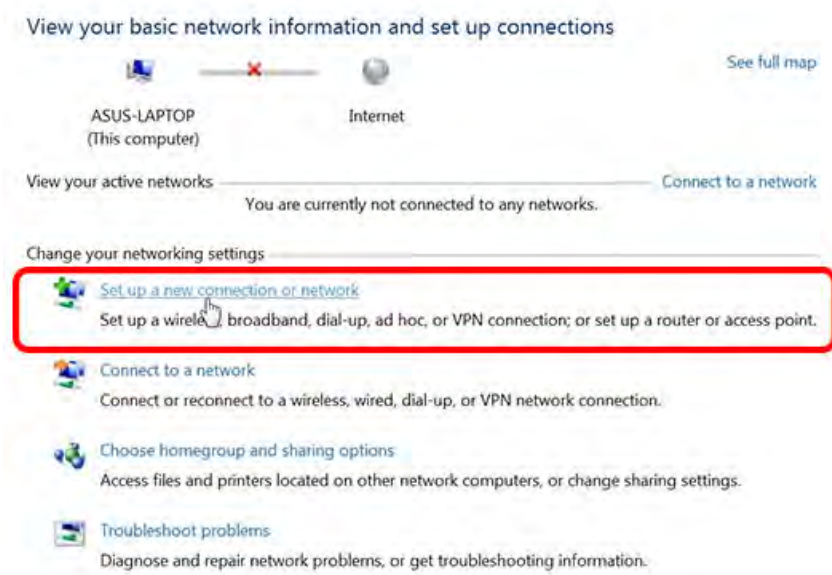

1. You will need to manually set up the connection.
Start by finding the WiFi icon located on the bottom right of your screen.

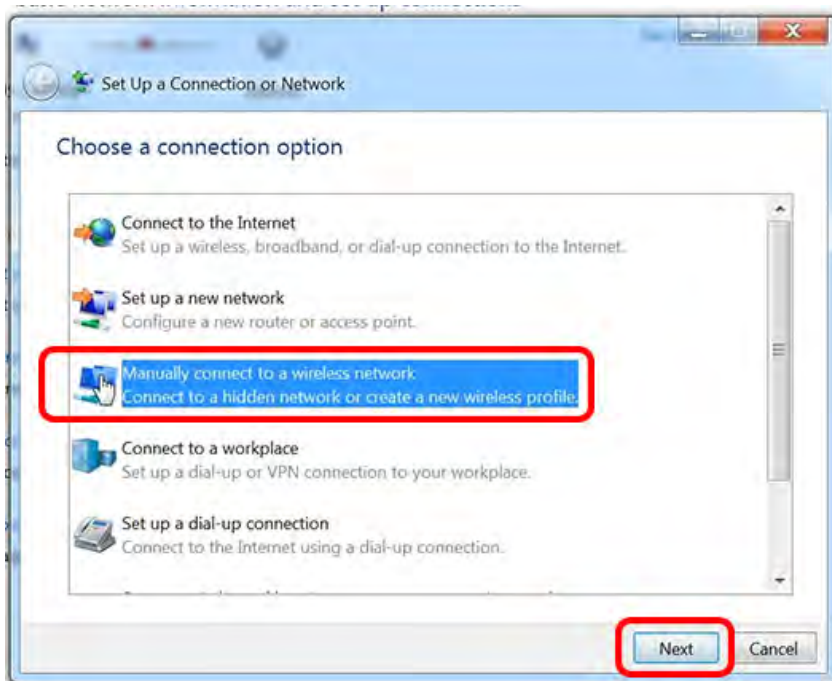

2. Right Click on the WiFi icon, then click the *Network and sharing Centre* option.

3. A new window called *Network and Sharing Center* will open. Click on set up a new connection or network .

4. A window called *Set Up a Connection or Network* will open. Choose *Manually Connect to a Wireless Network* and then click *Next*.

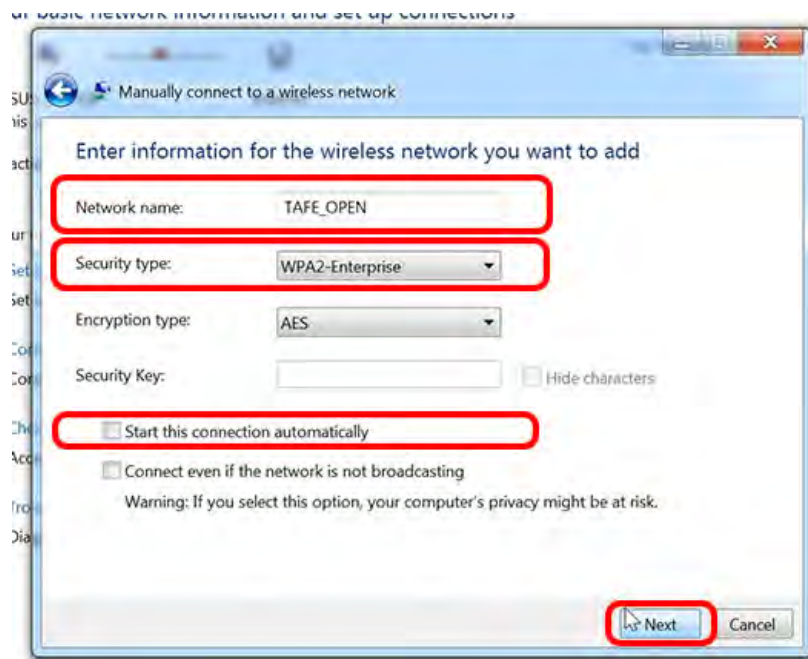

5. A new window called *Manually connect to a wireless network* will open.

Enter the following information.

Enter TAFE_OPEN in the field called *Network name*.

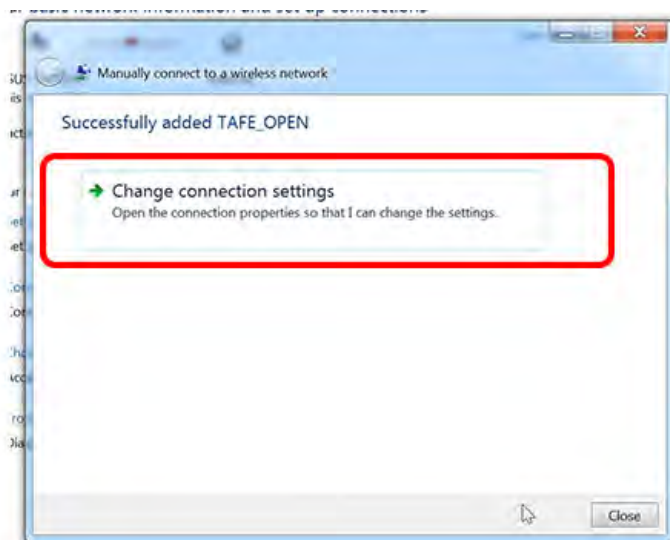

From the drop down menu *Security type* select the option called *WPA-2 Enterprise*.

Uncheck the box *Start this connection automatically* and click *Next*.

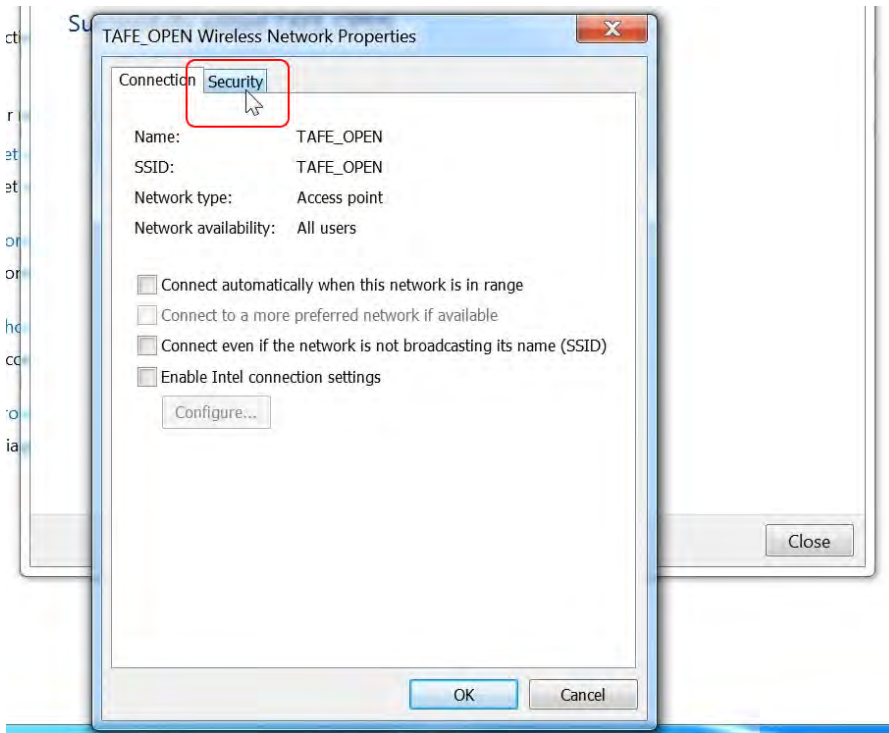

6. A new window will open telling you that you have successfully added the TAFE_OPEN network however there are still some further settings to change.

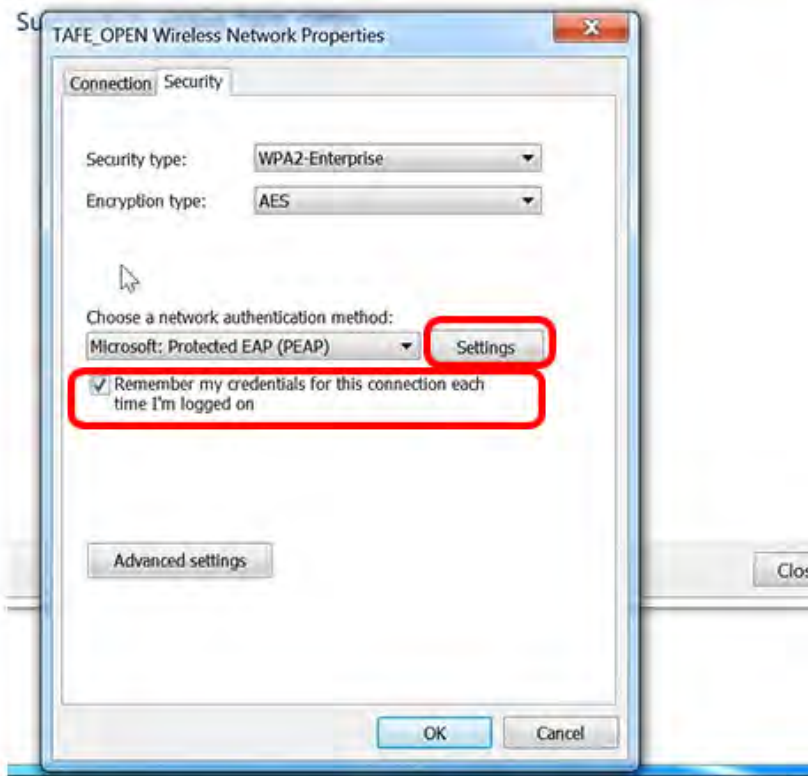

Click on *Change the connection settings*.

7. A new window called *TAFE_OPEN Wireless Network Properties* will open. Click on the *Security* tab.

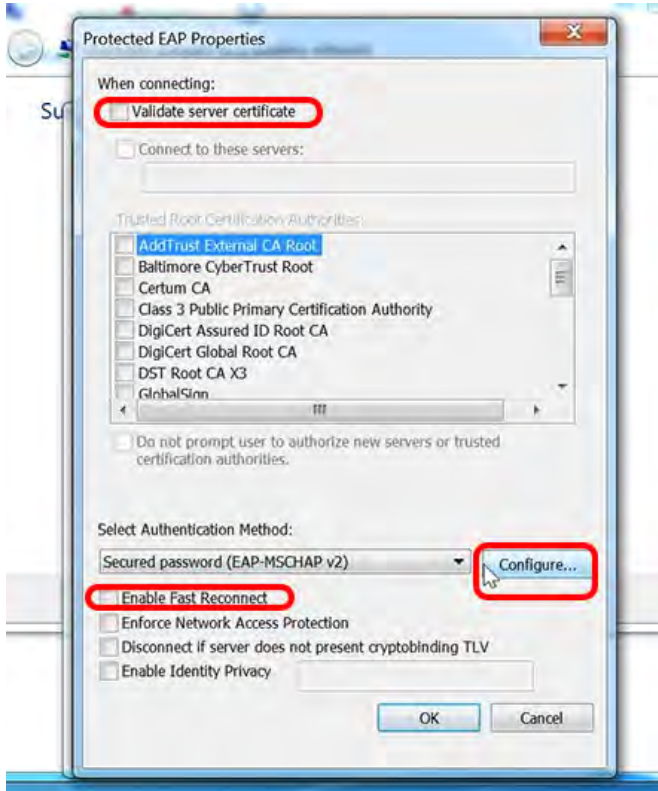

8. On the *Security* tab make sure the *Remember my credentials* box is checked and then click the *Settings* button.

9. The *Protected EAP Properties* window will now open.

Uncheck the box called *Validate server certificate* and also uncheck the box called *Enable Fast Reconnect*.

Click on the button called *Configure*.

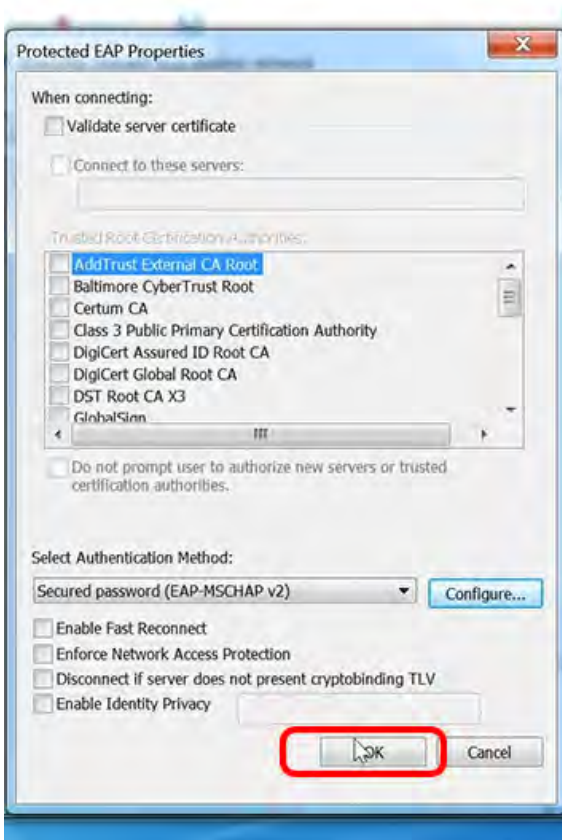

9. A new window called *EAP MSCHAPv2 Properties* will open.

Uncheck the box called *Automatically use my windows logon name and password*.

Click on *OK* and the window will close.

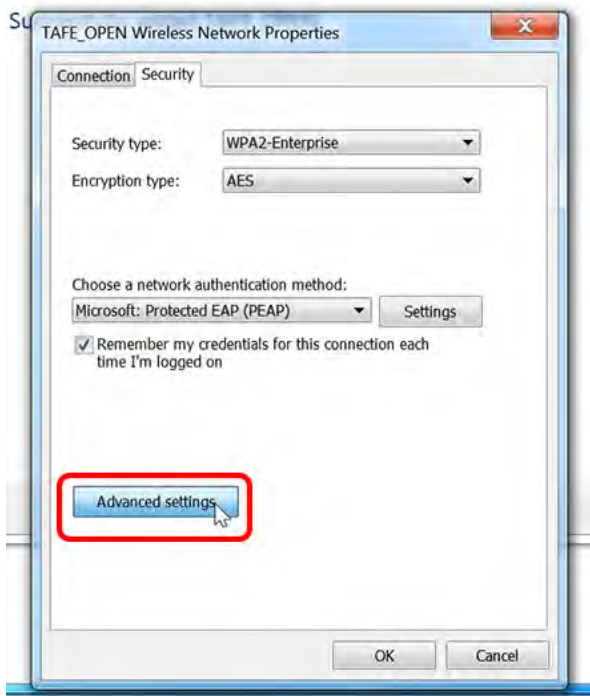

10. Click on **OK** again to close the *Protected EAP Properties* window.

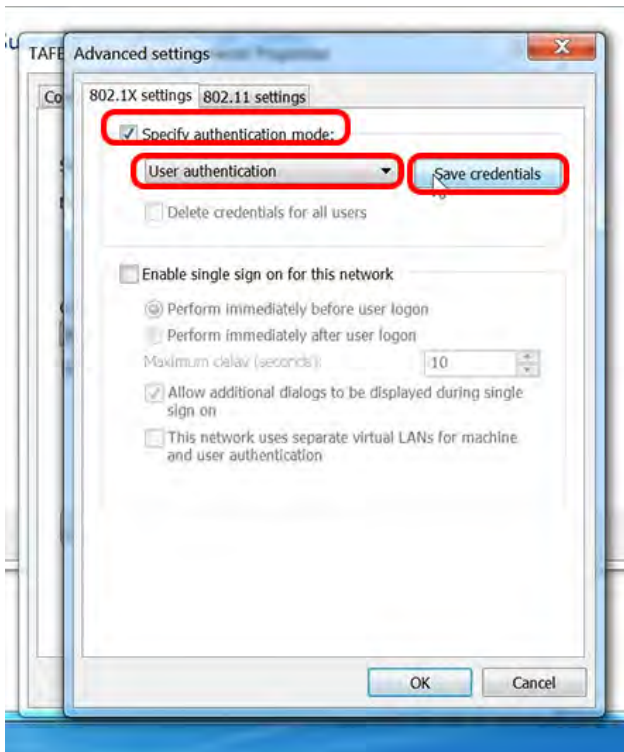

11. You have now returned to the *TAFE_OPEN Wireless Network Properties* window.

Click on the *Advanced settings* button.

- The Advanced settings window will now open, Check the box *Specify authentication mode*.
From the drop down menu below the check box select the option called *User authentication*.
Now click on the *Save Credentials* button.

- A window will now appear for you to enter and save your login credentials for accessing the TAFE Open network.
Enter your login details.
Your username uses your student ID number in the following format like this example.
studentnumber@student.tafe (e.g. 123456789@student.tafe).
Your password is your network password.
Now click on *OK*.

TAFE QUEENSLAND **CONNECTING TO TAFE_OPEN WIFI**

14. Now working back close the remain opening windows.

Click on *OK* to close the *Advanced Settings* window,

Then close click *OK* again to close *TAFE_OPEN Wireless Network Properties* window

Next close the *Manually connect to a wireless network* window by clicking on *Close*.

Finally close the *Network sharing centre* window in the usual manner by clicking on the red x in the top right of the window.

15. On the bottom right of your screen click on the WiFi Icon (refer to step 1).

You will now see all the WiFi networks available to you in your area.

From the list select the TAFE_OPEN network and then click connect.

You may have to briefly wait for the connection to be successful.
