

Mac OS

Before you start.

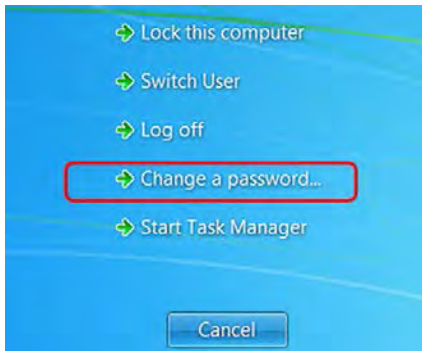

If you were provided with a temporary password for your new account please ensure you have logged into a TAFE computer and set a new password before attempting to connect to the TAFE_OPEN WiFi network.

If you have a working password please go to the next section *Steps to Connect to TAFE_OPEN*.

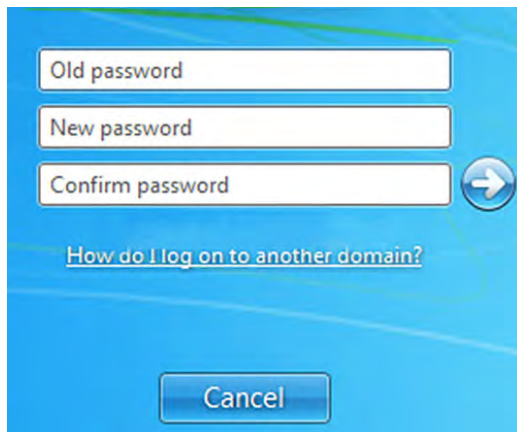

1. To Log in using your temporary password press CTRL + ALT + DELETE

2. An option Screen will appear. Click *Change a password*.

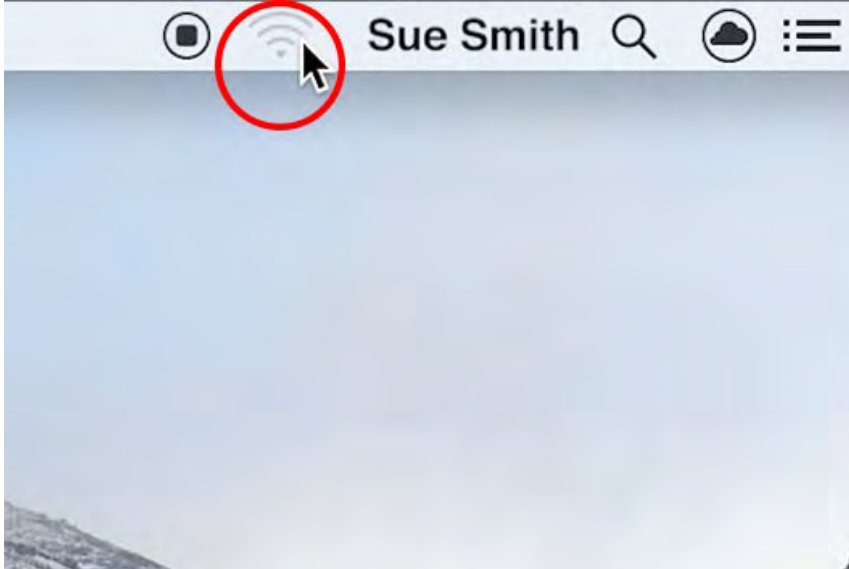

3. Fill out the three blank fields. Enter your temporary password.
Provide a new password and confirm it.
Click the arrow button to proceed with password change.

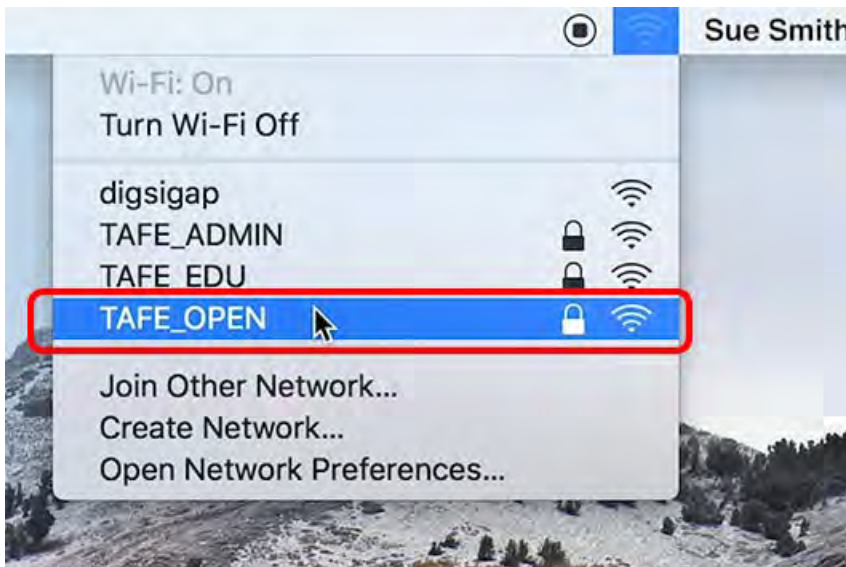

Steps to Connect to TAFE_OPEN

1. Click on the WiFi icon (top right of screen)

2. Click on the WiFi icon, a dropdown menu will appear showing you all networks located in your area. Click on the network name TAFE_OPEN.

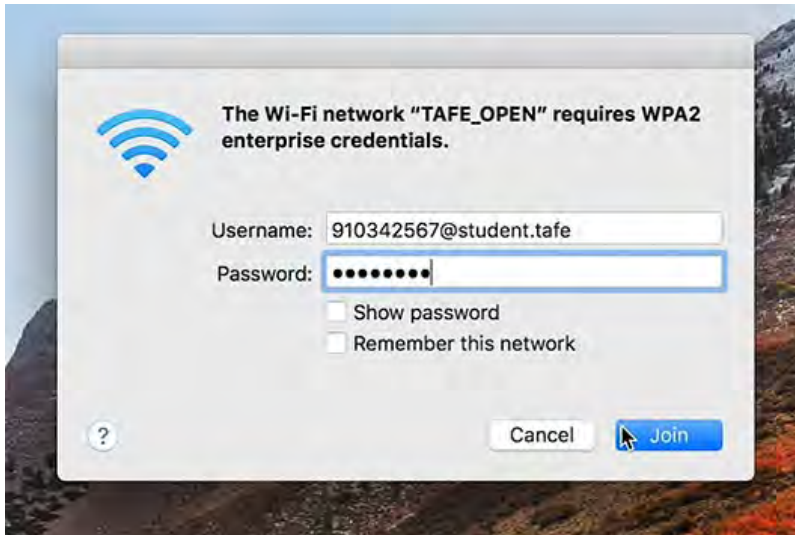

3. Enter your login details into the dialouge box.

Your username uses your student ID number in the following format like this example.

studentnumber@student.tafe (e.g. 12345678@student.tafe).

Your password is your network password.

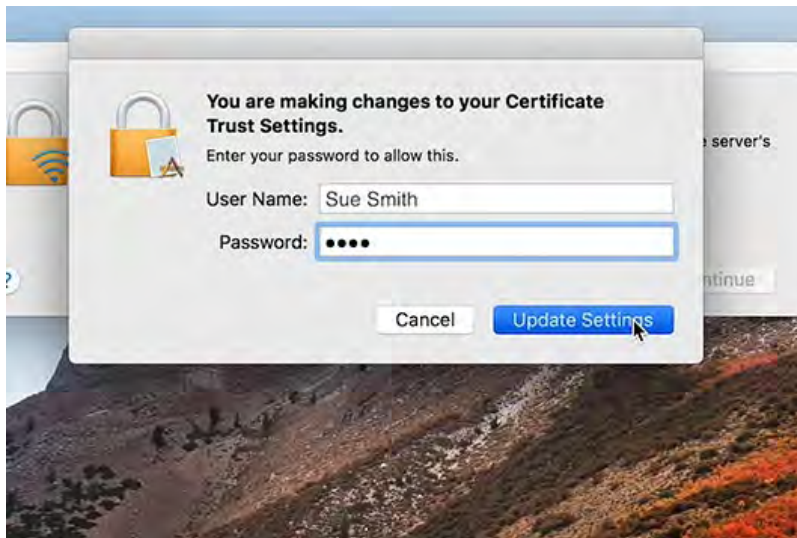

Once details are entered click on *Join*.

4. An additional authentication popup will appear, click on *Continue*.

5. Confirm changes to your security settings.
Enter the username and password you use for your device then click on *Update Settings*.

6. You can confirm you are connected to the TAFE_OPEN WiFi network by again clicking on the WiFi icon on the top right of your screen. The TAFE_OPEN will appear on the drop down menu with a tick next to it.

If you have forgotten or need to reset your password, use the TAFE Password Manager located on the Technical Support page.
