The Renewable Training Products Program (RTP) is one of the five (5) initiatives that will be developed by the Product Agency as part of TAFE Queensland Regional Economic Futures Fund Training.

The Renewable Training Products Program will deliver targeted regional specific training to meet industry requirements to support the transition to renewables in Mt Isa, Cloncurry, Kingaroy and Goondiwindi.

Project aim

The renewable training products program aims include:

- Providing renewable energy training and fostering community engagement to enhance economic prospects in communities
- Promoting environmentally sustainable practices
- Providing targeted training and qualification pathways for the workforce in specific regional areas
- Equipping individuals with the necessary skills to participate in the growing renewable energy industry suited to the particular region.

Deliverables

- Development and delivery of training pilot programs in the identified regional locations using the renewable energy training hubs and mobile training facility.

Delivery

The renewable training products program will utilise renewable energy training hubs and mobile training facility to ensure that pilot training programs and training outcomes meet industry needs.

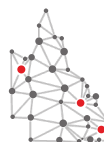

A range of specialised course content, including micro-credentials, train the trainer materials and nationally accredited units of competency will be developed as part of this training initiative.
