Certificate III in Marine Craft Construction

Gold Coast

Gain the technical knowledge and practical skills required to work as a boat builder and repairer with this intermediate-level course.

Develop your career in marine craft construction with this intermediate-level course. You will learn a broad range of practical skills and technical knowledge across a variety of vessels, enabling you to work as a boat builder and repairer.

Australia is recognised as a global leader in the marine craft construction industry boasting world-class boat building facilities and a reputation for delivering quality training. The industry relies on skilled workers to meet high-quality manufacturing standards and is prepared to invest in its workers to develop the skills required.

This course provides the skills required to perform a range of marine craft construction tasks. You will learn about occupational health and safety, trade

drawing and lofting, material science, composite, and timber construction. You will also study the repair and maintenance procedures associated with various construction methods. You will receive hands-on training delivered by our industry-experienced teachers in workshops equipped with the latest in marine technology.

Upon completion of this course you will be qualified to produce templates and patterns from full size detail drawings, conduct fit-outs and carry out repairs to wooden, fibreglass and composite marine craft. If completed as part of an apprenticeship this course will also allow you to apply for a trade qualification.

MEM30719 | CRICOS: 119144G
